X2. PIPE SCHEDULES

X2.1 The schedules of pipe shown in **Table X2.1** are regularly available. Other schedules may be furnished, and the manufacturer should be consulted. **Table X2.1** is published for information only.

X3. CONDITIONS AND FINISHES NORMALLY SUPPLIED

X3.1 Scope

X3.1.1 This appendix lists the conditions and finishes in which pipe and tube (other than converter sizes) are normally supplied. These are subject to change, and the manufacturer should be consulted for the latest information available.

X3.2 Cold-Worked Tube and Pipe

X3.2.1 *Cold-Worked, Annealed, with Ground Outside Diameter*—The inside diameter may have a bright finish when material is annealed in a protective atmosphere; otherwise, the inside diameter is supplied descaled as necessary. It is available in sizes ½ to 4 in. (12.7 to 102 mm), inclusive, in outside diameter in both normal and heavy-wall tube, and pipe sizes, all schedules, of corresponding outside-diameter dimensions.

X3.2.2 *Cold-Worked, Annealed, and Pickled (Not Ground)*—Outside and inside diameter will have dull, matte (pickled) surfaces. It is available in sizes ½ to 6⅝ in. (12.7 to 168 mm), inclusive, in outside diameter in both normal and

heavy-wall tube, and pipe sizes, all schedules, of corresponding outside-diameter dimensions.

X3.3 Hot-Worked Tube

X3.3.1 *Hot-Worked or Hot-Worked-Annealed (Not Pickled) Tube*—Has an oxide surface resulting from the hot-working operation. Intended generally for machined parts where the oxide surface will be removed.

X3.3.2 *Hot-Worked or Hot-Worked-Annealed (Pickled) Tube*—Has the oxide surface removed on both outside and inside diameters by pickling. Surface may be spot ground for removal of minor surface imperfections at the manufacturer's option.

X3.3.3 *Hot-Worked or Hot-Worked-Annealed (Machined Outside and Inside Diameters) Tubes*—The outside and inside diameter surfaces are machined to specified dimensions. Minor surface imperfections may be spot ground for removal, at the manufacturer's option.

SUMMARY OF CHANGES

Committee B02 has identified the location of selected changes to this standard since the last issue (B167 - 08) that may impact the use of this standard. (Approved October 1, 2011.)

(1) Added UNS N06674 to Title, 1.1, 12.3, Section 17, Table 1, and Table 2.

(2) Added new Section 6, 7.3, and 13.5. Other paragraphs have been renumbered, accordingly.
